SVQTD Database Release Agreement

INTRODUCTION

SVQTD is a audio-based database used for scientific research in paralinguistic singing attribute recognition tasks, which is proposed by Speech and Multimodal Intelligent Information Processing Lab (SMIIP Lab) at Duke Kunshan University. It is mainly collected from YouTube, and contains 4,000 vocal segments selected from 400 audio materials of six famous tenor arias. Anyone or group could use it freely.

RULES

1. Without the approval of the SMIIP Lab, the SVQTD database is not allowed to be modified and redistributed.
2. Without the approval of the SMIIP Lab, SVQTD database is not allowed for commercial purpose.
3. In any case, the audios could not be used in a way that may cause damages on human's mental health and personal privacy.
4. The signatory for this license must have the legal authorization on behalf of your institute or organization.
5. To use this database for publishing papers, please kindly cite the following: (undone)

COPYRIGHT

This database is freely released for research and educational purposes. We hold no liability for any undesirable consequences of abusing this database. All rights of the SVQTD are reserved.
